Bath Thermometer

General:

The Acutebaby thermometer allows you to accurately and conveniently measure the temperature of your bath.

Temperature:

The best convenient temperature for a bath for your child is between 36,0°C and 38,0°C.

Measuring the temperature:

1. Press the button direct above the display one time and wait until 'Lo °C' appears.
2. Put the bath thermometer in the water while you fill the bath.
3. Leave the thermometer in the water until a steady temperature is displayed. Now you can read the temperature from the display.
4. Press the button direct above the display once again to switch-off the thermometer.
5. Clean the thermometer and store it in a safe place.

Battery:

A long-life buttoncell is already installed in the thermometer. This battery will power the thermometer for up to 24,000 measurements (calculated with an average of 30 seconds per measurement).

Battery replacement:

You cannot change the battery in this thermometer. In case the battery is empty, than the complete thermometer must be replaced.

Please do not throw this product into the normal household garbage but bring it to a collection point for the recycling of electrical and electronic equipments.

Cleaning & Care:

- Clean the metal contact of the thermometer after each use with a soft, damp cloth or wash in water.
- Make sure never water remains in the frog for a longer period.
- After each use gently squeeze the rubber frog to remove water from the frog through the hole in the side of the BC-05.
- Never boil the thermometer, do not wash in a dishwasher, do not put in a microwave or HF-sterilization oven or clean with chemical cleaners.
- Protect the thermometer from heavy vibrations.
- Do not keep the thermometer in direct sunlight or close to any heating device.
- Do not remove the thermometer from the rubber frog.

Only to be used in water in which the child is within its depth and under adult supervision.

At the end of the product lifecycle, you should not throw this product into the normal household garbage but bring the product to a collection point for the recycling of electrical and electronic equipments.
